Z. Naturforsch. **58b**, 1234 – 1236 (2003); received June 10, 2003

The alkaloids evolitrine, acronycidine, melicopine, melicopidine, normelicopine, normelicopidine, acronycine, noracronycine, 12-desmethylacronycine, (+)-*cis*-1,2-dihydroxy-1,2-dihydroacronycine, and (-)-*trans*-1,2-dihydroxy-1,2-dihydroacronycine were isolated from *Medicosma subsessilis* bark, together with the new 1-oxo-2-hydroxy-1,2-dihydro-12-desmethylnoracronycine. The structure of the latter compound was elucidated on the basis of spectral data and partial synthesis.

**Key words:** *Medicosma subsessilis*, Alkaloids, 1-Oxo-2-hydroxy-1,2-dihydro-12-desmethyl-acronycine
