5-(6-Chloropyridin-3-yl methyl)-4-phenyl-1,2,4-triazole-3-thiol (2) and 5-substituted-4-phenyl-1,2,4-triazole-3-thiols (3) were synthesized. Alkylation and aminomethylation reactions of these triazoles were also carried out. Some of the newly synthesized compounds were screened for their antibacterial activities.

\textit{Key words:} 6-Chloropyridin-3-yl methyl Moiety, Triazoles, Aminomethylation, Antibacterial Activity, Serial Dilution Method
