Two new sesterterpenes, 14 β -methyllaucosesterterpenone (**1**) and 17 α -hydroxylaucosceptrine (**2**), along with a known triterpene, hypoglauterpenic acid (**6**), were isolated from the *Leucosceptrum canum* of Nepalese origin. The structures were elucidated on the basis of spectroscopy techniques.

Key words: *Leucosceptrum canum*, Sesterterpenes, Leucosesterterpenes, 14 β -Methyllaucosesterterpenone, 17 α -Hydroxylaucosceptrine
