Remote and α -Thio Carbene Complexes Derived from an Oxazolinyl-Substituted Thiophene

Liliana Dobrzańska, Gerrit R. Julius, Elzet Stander-Grobler,

Yolanda Burger (née Stander), Stefan D. Nogai, Stephanie

Cronje and Helgard G. Raubenheimer

Fig. S1. Fragment of the supramolecular 1D strand in compound **1** linked by weak C–H...N (blue) and C–H... π (yellow) hydrogen bonds shown down the crystallographic *a* axis.

Fig. S2. Capped-sticks representation of solvate **5b**, with labelled coordination sphere of Pd(II), triflate counterion and dichloromethane molecules.

Fig. S3. Packing diagram of **5b** shown down the crystallographic *c* axis.
