*Avicennia marina*, Iridoids, Geniposidic Acid

Three new iridoid glucosides, 10-\textit{O}-[(\textit{E})-cinnamoyl]-geniposidic acid, 10-\textit{O}-[(\textit{E})-\textit{p}-coumaroyl]-geniposidic acid, 10-\textit{O}-[(\textit{E})-caffeoyl]-geniposidic acid and the known iridoid glucoside, 2′-\textit{O}-[(\textit{E})-cinnamoyl]-mussaenosidic acid have been isolated from *Avicennia marina*. The structures were determined primarily by NMR spectroscopy. The assignment of NMR signals was performed by means of $^1$H–$^1$H COSY, HMQC and HMBC experiments.
