Z. Naturforsch. **60 c**, 22–24 (2005); received August 4/September 14, 2004

From an EtOAc extract of *Dracocephalum subcapitatum*, five flavonoids, calycopterin, xanthomicrol, isokaempferide, luteolin and apigenin, together with five terpenoids, oleanolic acid, ursolic acid, geranial, neral and limonene-10-al, were isolated. Among them, citral and limonene-10-al were the most effective components against epimastigotes of *Trypanosoma*

cruzi, the parasitic agent of Chagas disease.

Key words: Dracocephalum subcapitatum, Labiatae, Limonene-10-al
